

IMPERIAL WHITETAIL RESULTS™

Premium Deer Feed with 20% Protein

The Whitetail Institute is the originator and leader of the deer-nutrition industry. For over 20 years, the Institute has continued to provide hunters and managers with the most heavily researched and tested deer nutrition products in the world. The Institute remains the industry leader today because of its total dedication to scientific research and truly exhaustive testing. **Imperial Whitetail Results** is the only complete deer feed that bears the Imperial™ name. And the reason is simple — **Results** is the only complete deer feed that has passed all levels of Institute testing in real-world conditions from Florida to Canada, and from New York to Texas. Is such stringent testing worth it? At the Whitetail Institute, we think so. In fact, it's our exhaustive research and testing that keep Imperial products number one — as our motto says, **"Research = Results!"**

"Deer Nutrition Is All We Do!"

Available through Whitetail Institute, Southern States/Agway and MFA

Why IMPERIAL WHITETAIL RESULTS™ is a superior deer feed

Results is a complete deer feed scientifically formulated to provide maximum nutritional benefit to deer throughout the year. **Results** is designed to help maximize rack size in bucks, improve the quantity of milk production in does, increase birth weights and growth in fawns, and promote overall herd health. Here are some of the specific benefits **Results** provides:

Helps Maximize Antler Growth!

- **20% Protein to Help Maximize Antler Growth!** High protein content for antler growth, doe lactation and fawn growth during Spring and Summer.
- **Contains Vital Minerals and Vitamins to Help Maximize Antler Growth!** Contains vital macro minerals, micro minerals and vitamins in the correct forms and ratios to help maximize antler mass.
- **Helps Bucks Devote More Nutrition to Antler Growth Earlier in Spring!** Scientifically formulated to help keep bucks in better condition through the Winter and the rut, recover more quickly in the Spring, and devote more nutrition to antler growth earlier.

Helps Maximize Doe Lactation, Fawn Birth Weights, Growth Rates and Overall Herd Health!

- **Contains Critical Protein, Vitamins and Minerals for Does!** Provides abundant protein, minerals, vitamins and energy so critical to does and their unborn fawns, and later to help boost milk volume in lactating does.
- **Source of High Carbohydrates and Lipids for Fall and Winter!** Provides critical energy to deer during periods of low natural food availability, such as Fall and Winter. Helps deer reduce weight loss caused by poor quality nutrition and helps them recover winter weight losses earlier in Spring.

Specifically Designed for the Needs of Deer!

- Scientifically formulated to meet the unique requirements of the small-ruminant digestive system of deer.
- Contains macro minerals, micro minerals and vitamins in the correct forms and ratios deer need to help maximize genetic potential.

Extremely Attractive to Deer!

- **Crunchy texture** deer prefer.
- Contains **scent and taste enhancers** including **Devour**, which drives deer wild!

Maximum Flexibility in Delivery Systems!

- Can be use in most spin-type feeders, trough feeders, and gravity feeders.
- **Rainshed™ Technology** — Moisture resistant.
- Pelleted form reduces waste.
